

SKILL LEVEL:  
**MEDIUM**

# Watering Can

1. Use a sharp knife to cut the top off of your pumpkin and remove all of the seeds and pulp. Scrape the sides well so that the interior is relatively dry.
2. To transfer the stencil, cut it out of this sheet by cutting around the whole design. Use packing tape to adhere the stencil to the pumpkin. Cover the paper entirely with tape. This will help it stay in place and waterproof the paper.
3. **If you have a shaving tool:** Using pumpkin carving tools, carve the watering can and handles first, then the flower petals. Use a punching tool, skewer or toothpick to poke the holes. Using a sharp pencil, trace around the centres of the flowers to imprint the shape onto the pumpkin. Remove the stencil and use a shaving tool to shave the centres of each flower.
4. **If you do not have a shaving tool:** carve the watering can and handles first, then the flower centres, then the petals. Use a punching tool, skewer, or toothpick to poke the holes. Remove the stencil.
5. Place a candle inside and enjoy!

**Adult supervision required. Please ask an adult for help when using pumpkin carving tools.**
