CREATE A VERTICAL GARDEN WITH VINES.

Adding vines to your landscape introduces vibrant vertical interest enhancing your garden throughout the growing season. Their climbing habit complements the growth habits of other plants like roses or shrubs, creating stunning combinations and leading to a more diverse and visually appealing garden.

OUR FEATURED VINE IS CLEMATIS

The lush foliage of clematis provides a flourishing backdrop for their vibrant blossoms, adding a burst of colour and elegance to your garden.

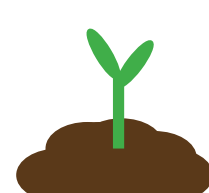

LIGHT REQUIREMENTS

Most varieties require +6 hours of full to part sun to produce stunning blooms.

WATERING GUIDELINES

To develop a robust root system, water clematis regularly when first planted. Once established, water once a week.

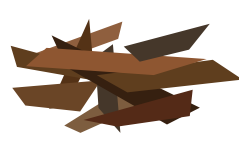

SOIL PREFERENCES

Plant in well-draining soil that retains its moisture. Clematis also prefer slightly acidic soil with a pH of 6.5 to 7.0.

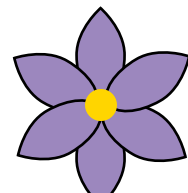

FERTILIZER

Apply a well-balanced fertilizer when planting and in early spring before flowers appear.

MULCHING

To keep roots moist and cool, mulch around the base of the plant mid-spring.

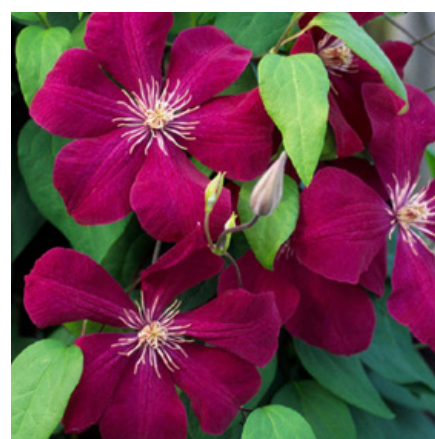

FLOWERING TIME

With several varieties, clematis can bloom from early spring to mid-summer.

SHOP OUR CLEMATIS COLLECTION!

Visit us online or stop by one of our garden centers to explore our beautiful clematis collection.
