# ROSE OF SHARON

July 25<sup>th</sup> – 31<sup>st</sup>, 2024

**20% Off\***  
regular price

**ADD BEAUTY AND GRACE TO YOUR GARDEN**

Add a touch of elegance to your garden with the Rose of Sharon! Suited for zones 5-9, this stunning shrub produces large, hibiscus-like flowers in various colours that attract pollinators like bees and butterflies, adding life and movement to your garden.

The Rose of Sharon is a must-have for any garden enthusiast, perfect for creating a vibrant and eye-catching landscape.

### LIGHT REQUIREMENTS

Most varieties require at least 6 hours of full sun to part shade to grow stunning blooms while tolerating summer heat and humidity.

### WATERING GUIDELINES

When first planted, water your Rose of Sharon regularly to ensure the soil is consistently moist. Once established, the plant can tolerate dry conditions.

### SOIL PREFERENCES

Plant in well-draining soil that retains moisture. The Rose of Sharon also tolerates poor soil conditions and different pH levels.

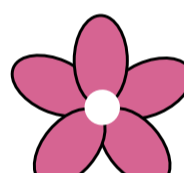

### FERTILIZER

Apply a granular rose fertilizer in early spring to encourage blooms.

### MULCHING

After planting, add a layer of mulch to help retain moisture in the soil and suppress weed growth.

### FLOWERING TIME

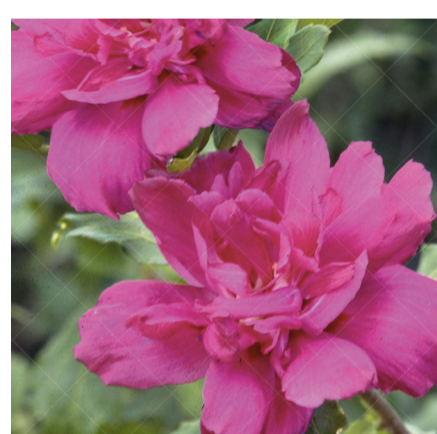

Blossoms can appear from midsummer to the Fall months.

### PRUNING

To control the plant's growth, prune in late winter or early spring.
